Europe Code League Project Video

Instructions

Present your project in an interesting, informative and inspiring way. The viewer should have a good idea what your project is about but still want to know more.

The maximum length for your video is 2 min 30 sec including credits.

Use the first 30-45 seconds to tell everyone where you are from and present your school and your team. For inspirations watch the team introductions from the Europe STEM League: https://bit.ly/2wi8Lfu

Make your video in English, no subtitles.

Further information

16:9 The format of the video should be 16:9 because it is the standard for many video portals such as youtube.

Use landscape format when you record your video.

The ideal resolution for your video is 1920 x 1080. If you do not have the equipment to record in this resolution you can also use 1280 x 720.

You do not need a video camera to record your video. Tablets or smartphones are enough.

Make sure the music in your video has a suitable license (best is CC BY). You can find some music here: creativecommons.org/legalmusicforvideos

Make sure that there is no copyright infringement with any of the material you use in your video.

If you show people in your video ensure you have their signed consent. In case of underage students it needs to be the signature of the parents or legal guardians.
